PeopleSoft PeopleTools II

DESCRIPTION

PeopleTools II expands on the skills acquired in PeopleTools I. In this five-day course, you'll gain advanced development experience as you create applications that incorporate key features like views, subrecords, subpages, PeopleCode, images, and selected fluid user interface features.

BENEFITS TO YOU

Expand your PeopleSoft development and troubleshooting skills so you can work with more complex features, further enhancing the functionality of your PeopleSoft applications to meet your organization's business needs.

FILTERS

- Learn about Oracle's Products: PeopleSoft Tools
- Version: Release 8.58, Release 8.57
