

# Dell NetWorker Implementation and Administration

## Course Description

### Course Duration

5 Days

### Overview

This course explains and demonstrates the deployment, configuration, and use of NetWorker. Students learn how to deploy the NetWorker components; how to upgrade NetWorker to the latest release; and how to configure NetWorker for operation. Students also learn how to create and manage user accounts; how to configure and initiate backup and restore of data, and how to monitor NetWorker operation. This course includes labs to reinforce these skills through exercises.

### Audience

This course is intended for Dell internal, and external customers and partners, whose roles are backup administrators, software support specialists, and others who install, configure, and support NetWorker in Windows and Linux environments.

### Prerequisite Knowledge/Skills

- Windows or Linux system administration
- PowerProtect DD systems and administration
- Common enterprise backup and recovery concepts and principles
- Enterprise SAN/LAN concepts

### Course Objectives

Upon successful completion of this course, participants should be able to:

- Install NetWorker and NetWorker Management Console
- Use NetWorker resources and administrative interfaces
- Configure and perform backup and restore operations
- Manage NetWorker media and devices
- Manage NetWorker databases
- Perform cloning and staging
- Utilize NetWorker daemons and logs
- Back up and recover the NetWorker Management Console and NetWorker servers
- Configure and perform NetWorker and VMware backups and recoveries.

### Course Outline

The content of this course is designed to support the course objectives.

# Dell NetWorker Implementation and Administration

## Course Description

### Course Duration

5 Days

#### Dell NetWorker Concepts

- Explore NetWorker Benefits
- Explore NetWorker Architecture

#### Dell NetWorker Implementation

- Explore Dell NetWorker Components
- Performing Dell NetWorker Installation

#### Dell NetWorker Administration

- Examine NetWorker Users Management
- Explore NetWorker Daemons and Processes
- Manage and Track Media
- Examine Managing and Configuring Backup Devices
- Perform NetWorker Backups
- Manage the NetWorker Database
- Perform NetWorker Recoveries
- Performing Cloning and Staging
- Examine VMware Backup and Recovery
- Explore NetWorker Reporting and Logs
- Examine NetWorker and NMC Servers

In addition to lecture and demonstrations, this course includes labs designed to allow practical experience for the participant.

### Course Delivery Modes and Product Version Information

Refer to the **Product Version Description** document for a list of Delivery Modes and product versions covered by this course.
